SUMMARY

Cybersecurity-focused IT Support Tech with 2+ years of hands-on experience in IT Support, service desk operations and systems administration, with growing exposure to security operations, incident response and assessments. Building experience in SIEM monitoring, endpoint hardening, & vulnerability assessment across web and network environments. CompTIA Security+, Google Cyber Security Cert & ITIL Certified. With a Bachelor's in Information Security underway, actively working toward a career in security ops & risk.

CORE SKILLS

IT & Service Operations: Tier 1/2 IT Support | Service Desk Operations | Windows OS Administration |

Network Troubleshooting | LAN/WAN/TCP-IP | ServiceNow/Jira | ITIL | Technical Documentation

Identity & Access Management: AD & IAM | MFA & Access Control | User Lifecycle Management

Security Operations & Monitoring: SIEM Monitoring | Incident Mgmt | Endpoint Hardening | Patch Mgmt

Offensive Security & Assessment: Penetration Testing Support | Vulnerability Scanning

GRC, Risk & Compliance: Risk Assessments | Compliance & Audit Support

EXPERIENCE

Tool-Go Inc.

Cybersecurity Intern

Mar 2025 – Aug 2025

- Contributed to penetration testing and vulnerability assessments across web application and network env.
- Assisted with denial-of-service (DoS) stress testing and attack surface mapping, gaining hands-on exposure to offensive security methodologies.
- Analyzed security alerts to identify indicators of compromise (IOCs); produced assessment reports and maintained technical documentation to support engagement records.

SecureLogix

IT & CybSec Support

Mar 2024 – Jan 2025

- Monitored and triaged security alerts via SIEM; executed incident response and escalation procedures to minimize dwell time.
- Administered user lifecycle management, access reviews, and endpoint hardening against organizational security baselines.
- Supported vulnerability scanning, risk assessments, and compliance activities contributing to audit readiness.
- Delivered Tier 1 & 2 technical support; maintained incident records and post-incident documentation for SLA adherence.

PROJECTS

- REXDR** – Modular threat hunting system; 8 integrated tools across recon, analysis, and response clusters mapped to MITRE ATT&CK. (Python, Scapy, Sigma, SQLite) (in-progress)
- Academic Security Labs** – Network segmentation, firewall config, IoT pentesting, and full network overhaul; all documented and graded. (pfSense, Wireshark, VirtualBox, Raspberry Pi)
- IT Automation Scripts** – Scripts built from real help desk work; account management, log parsing, system health checks. (Python, PowerShell, Bash)

EDUCATION

Bachelor's in Information Technology (Information Security)

Ontario Tech University

Fall 2025 – Spring 2027

Diploma in Systems Management & Cybersecurity (Graduated with Honors)

Oulton College

Fall 2024 – Spring 2025

CERTS

CompTIA Security+ | Google CyberSecurity Cert | ITIL Foundation | more (see LinkedIn)
